Universal Valve Lockout with Arm and Cable

Model	Description
040.144	Universal valve lockout device with adjustable arm and cable. Overall size: 59×174mm, shackle size: 84mm.

Dimensions	Image
• Overall Size: 59 mm × 174 mm • Shackle Size: 84 mm • Cable Length: Adjustable to fit various valve sizes.	
Material	Features
• Body & Shackle: Hardened heavy-duty steel. • Coating: Rust-proof finish for durability in harsh environments.	• Multi-Padlock Capability: Secures energy sources with multiple padlocks for group lockout. • Universal Fit: Adjustable arm and cable accommodate a wide range of valve sizes. • Safety Compliance: Keeps equipment inoperative during maintenance or repair. • Durable Construction: Designed for industrial use with high resistance to wear and tear.

Temperature Range	Chemical Resistance
• Steel Body & Shackle: -20°C to +120°C (-4°F to 248°F).	• Resistant to oils, moisture, and mild industrial chemicals. • Avoid exposure to strong acids or corrosive substances.
